Cycle Timing: Crucial

Central to Lion investment strategy

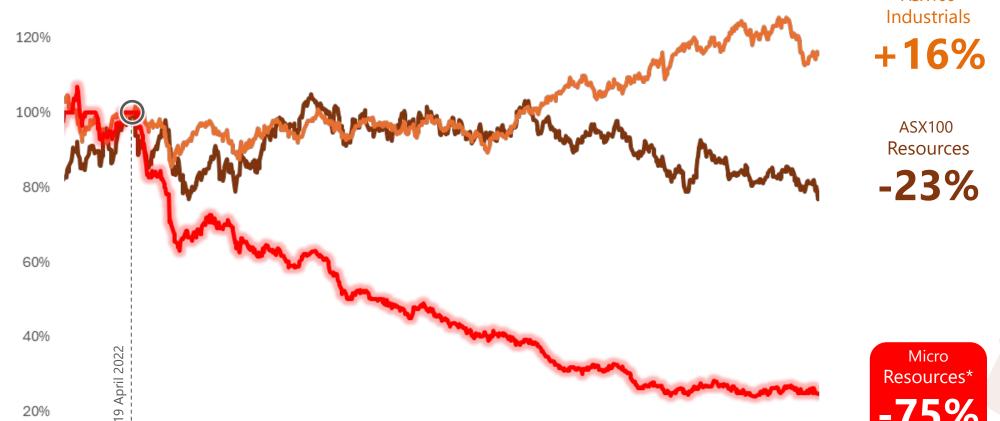

- Characteristic market patterns define cycles for resources stocks
- Cyclic volatility is particularly pronounced for micro-capitalisation stocks
- Lion aligns investment behaviours to the cycle
- The mining boom hasn't started yet

Commodities VS Equities

How will history describe the present...?

Probably as "under-prepared"

- Expected rotation of the long-term Commodities / Equities ratio back to commodities
 - Historically, this has created the *most substantial* mining booms
- 2. Coincidence of strong commodity fundamentals

The mining industry is extremely under invested in future supply

Strong Chinese and BRIC nation gold appetite

Future demand patterns will reflect greater intensity of use for many critical / strategic materials under an **Energy Transition**

- Cyclical recovery: the next mining boom
- 4. Recovery of market appetite for risk and micro-caps
 Risk appetite connected to interest rates

- 1. Refer to Lion Selection Group announcement to ASX on 4 April 2025
- Total Shareholder Return (TSR) for Lion Selection Group as at 31 January 2025 since inception in July 1997 was **8.9%pa**, versus the ASX Small Resources Accumulation Index **4.5%pa**Investment performance figures reflect the historic performance of Lion Selection Group Limited (ASX:LSG, 1997–2007), Lion Selection Limited (ASX:LST, 2007-2009), Lion Selection Group Limited (NSX:LGP, 2009-2013) and Lion Selection Group Limited (ASX:LSX, 2013-present).

Methodology for calculating total shareholder return is based on MorningStar (2006), which assumes reinvestment of distributions.

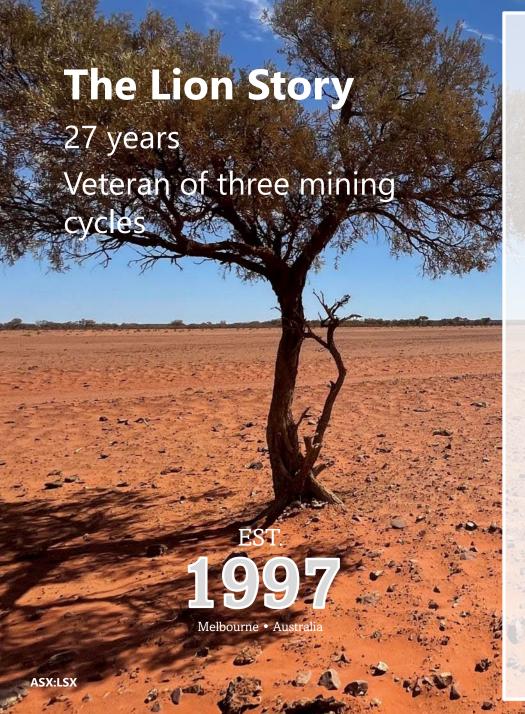

Lion assume all distributions are reinvested, with all non-cash distributions sold and the proceeds reinvested on the distribution pay date.

Investment performance is pre-tax and ignores the potential value of franking credits on dividends that were partially or fully franked.

Past performance is not a guide to future performance.

Indices used for comparison are accumulation indices, which assume reinvestment of dividends.

Data source: IRESS, Lion Manager

Founded in 1997 by Robin Widdup, Lion Selection Group has built a track record as a successful investor in mining assets and interpreter of the cycles of mining.

In a 27-year history, Lion has been an early shareholder and contributed to the success of a long list of successful mining companies. These include East African Gold Mines (The North Mara Mine which is now a substantial gold producer for Barrick in Tanzania), Consolidated Minerals, Independence Group (now known as IGO), Catalpa Resources (now known as Evolution Mining), MPI Mines, Redback Mining, Gallery Gold, EganStreet Resources, Indophil Resources and Platmin. Profitable exits have enabled Lion to make distributions to shareholders exceeding 341cps² which underpin Total Shareholder Return since 1997 well exceeding the ASX Small Resources Index².

In 2021 / 2022 Lion exited two substantial Indonesian gold investments which resulted in a cash return to Lion of over \$90M at the top of the mining cycle. \$16.7M of this cash was distributed via dividends and an on-market buy-back, the remainder is available for investing in a market that has more than halved. Lion is strongly re-capitalised for a new mining boom cycle.

Lion closely monitors the mining cycle via the Lion Mining Clock and aims to align investments and exits with mining busts and booms to take best advantage of weak markets to invest and strong markets to sell.

Lion has always backed people whose competency and integrity are high and aligned with our own.

Our sole focus is developing a commodity diverse portfolio of pre-production Australian mining assets that have strong investment cases. This positions Lion as a mid-tier sized mining house of the future, with high leverage to the long term strongly positive fundamentals for mineral commodities and the inevitable next mining boom, based on assets that have been accumulated through the current weak market.

Commodities

When the sky is the limit, and when it isn't

Gold:

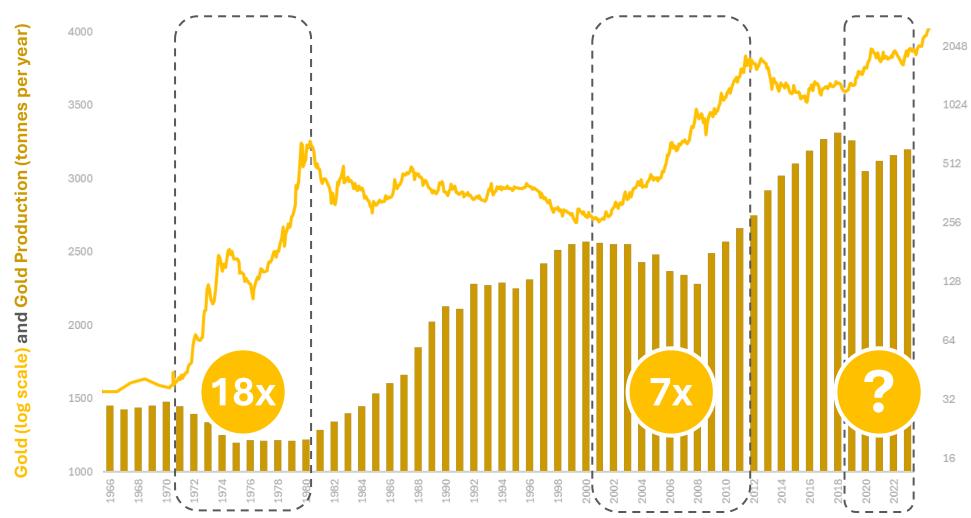

- One of the best performing assets over multi-decades
- Priced influenced more by buyer urgency than value in use

Copper:

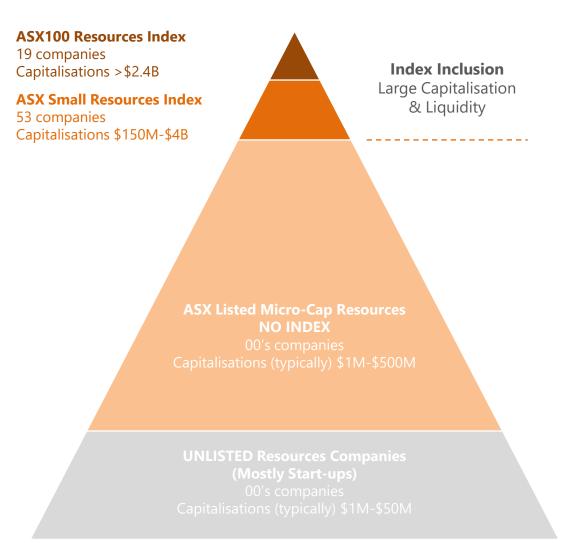

- Bellwether of the global economy
- Price practically constrained by what users are prepared to pay / can pass on
